Dear Mr. Foster:

In response to your letter of 19 October 1961, we will be pleased to participate in the study of inspection problems connected with the disarmament program prepared by your panel of consultants. I understand that you met with Dr. Hoevlin on 31 October to discuss the form which this support might take.

As a follow-up to that meeting, I should like to name [redacted] as the point of contact and coordinator for the Central Intelligence Agency. [redacted] is an assistant to Mr. Robert Amory and can arrange for such additional support as may be required from this Agency.

I look forward to the continued fruitful collaboration in the field of arms control and disarmament.
